

MIA

PRIVATE AND

INDEPENDENT HOSPITAL

CREDENTIAL

REQUIREMENTS

Find out more about the required DBS certificates and vaccinations for entering your hospitals.

Introduction

Welcome to your one-stop-shop for all things ‘credentials’ in the world of MIA. In this document, you will find all the information you require for entry requirements to the hospitals you visit. This document sorts the hospitals in alphabetical order by Private Group name. If you are looking for a specific hospital, we advise that you use the Find function (‘Ctrl+F’ on a Windows computer, ‘Cmmd+F’ on Apple).

This document covers Private Groups and Independent Hospitals only. Please return to the webpage you have travelled from and click on ‘NHS Hospital Credential Requirements’ to view any National Health Service hospital credentials.

Should you wish to look at a full list of the providers that use MIA, please visit our website on:

<https://www.miaweb.co.uk/resources/participating-healthcare-providers/>

Key

Denotation	Meaning
B	Basic DBS required
S	Standard DBS required
E	Enhanced DBS required
HB	Hepatitis B inoculation required
MMR	Measles, Mumps and Rubella inoculation required
CP	Chickenpox (Varicella Zoster) immunity or inoculation required
*	Additional information – see table toward rear of document.

Please note: If a Hospital is denoted as having a requirement for vaccinations, this is purely limited to clinical areas. Administrative areas or areas without patients present will not require a vaccination, though if the area you are visiting is in a clinical are (i.e. Offices located within Theatres), you may still be required to have the vaccinations uploaded to your profile for access. Please check if this is the case by attempting to register a visit on the system/via the app. This will tell you about the requirements for individual departments.

Should you need any further information about a hospital, please do feel free to contact our Client Relations Team on 01732 920 900 or help@miaweb.co.uk.
