

Our Net Zero Commitment

How MIA is making steps toward the NHS Carbon Zero target

MIA are delighted to announce our pledge to the government's Net Zero commitment to cut our carbon emissions by 50% by 2030 and 100% by 2050 – if not before!

MIA is dedicated to improving our carbon footprint and we have already taken steps by signing up to the UK Business Hub. This means we are now recognised by the United Nations Race to Zero campaign to become a climate leader, inspiring others to improve the effects of their businesses on the environment.

MIA is taking the necessary steps to support the NHS on meeting its Net Zero target. We are actively enhancing our platform to support both the NHS and supplier companies in the journey to provide carbon neutral healthcare.

We are also working in alignment to ISO 14001:2015 to ensure our approach to Net Zero meets the highest recognised industry standards.

“ At MIA we welcome the opportunity to help the NHS with its carbon zero targets. With an ethos and philosophy focused on education and compliance combined with our unique customer base, we're able to communicate and educate over 1,000 MedTech, medical device and life science companies in delivering this essential objective for the NHS.

Nicola Arcos, Managing Director ”
